Legend Dr. Jack Wheeler,
to Appear January 22nd On The Neal Asbury Show on WZAB-AM

In the 1980s he conducted a series of extensive visits to anti-Soviet guerrilla insurgencies in Nicaragua, Angola, Mozambique, Ethiopia, Cambodia, Laos, and Afghanistan, and to democracy movements in Eastern Europe and the Soviet Union. These visits made him an unofficial liaison between these nations and the Reagan White House. Based on his experiences with anti-Soviet insurgencies, he developed the strategy for dismantling the Soviet Empire adopted by the White House known as the "Reagan Doctrine." It worked.

Because of his love for adventure, Jack has traveled to over 180 countries and all seven continents and leads two or three expeditions a year. He consults for a number of international corporations on geopolitical strategy. He also advises a number of Congressional offices on issues regarding political and economic freedom throughout the world and in the United States. He is the editor of To The Point, a subscriber website of geopolitical intelligence at www.tothepointnews.com.

The Neal Asbury Show tackles key trade issues every Thursday from 11:00 AM until Noon on WZAB-AM 880. The show is streamed live on line at WWW.880THEBIZ.COM, which is affiliated with Bloomberg Radio and CNBC.

"Jack Wheeler is just about the most interesting man I know. As a professional adventurer, he has discovered lost tribes and led expeditions to every corner of the globe. As a geopolitical strategist, he created the Reagan Doctrine, which led to the demise of the Soviet Union. He is a brilliantly original thinker and deeply perceptive analyst of world events. I value his counsel and friendship."
U.S. Congressman Dana Rohrabacher (R-CA)

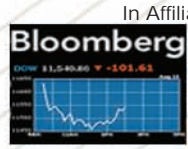

From the time Jack was a young boy, he was adventuresome. At age 12, he became the youngest Eagle Scout in Boy Scout history and was honored as such at the White House by President Dwight Eisenhower. At age 14, he climbed the Matterhorn in Switzerland. At 16, a clan of Shuara Jivaro headhunters in the Amazon adopted him. At 17, he hunted and killed a man-eating tiger responsible for the

deaths of over 20 Montagnard tribes people in the highlands of South Vietnam. And he owns a spot in The Guinness Book of World Records for the first free fall sky-dive in history at the North Pole.

He received his Ph.D. in Philosophy from the University of Southern California, where he lectured on Aristotelian ethics.
